Volume 21 | THE REDCLIFF REVIEW THURSDAY, SEPT. 22nd, 1932 | Number 48

Gordon Memorial To Hold Anniversary

Dr. Powell of Calgary Will be Special Preacher

Anniversary services will be held in Gordon Memorial church next Sunday and Monday.

Rev. Dr. Thomas Powell, superintendent of missions for the United church will occupy the pulpit at both services on Sunday. Dr. Powell is recognized as one of the foremost clergymen of the province and as he is wel posted on conditions throughout the provinces his addresses are sure to be of interest.

On Monday evening the anniversary supper will be held from 5:30 to 7.30 and at 8 o'clock there will be a concert by Medicine Hat and local talent Tickets for the supper will be 35c, children 20c. Admission to the concert 25c children 10c.

The little baby boy of Mr. and Mrs. Hnatink died suddenly Sunday. The funeral took place in Medicine Hat on Tuesday

* * *

Miss Gretta McKay, who has been visiting at home for the past week, returned to Brooks Monday.

* * *

Raymond Dubeau suffered a severe attack of appendecetis the other day but is now much improved.

* * *

Heavy ain all day last Sunday again delyed threshing operations. The high wind and rain appear to have been general throughout the province.

* * *

John Ellis, the world's most famous hangman, committed suicide in London yesterday. Ells bore the reputation of sending more condemned murderers t their death than any other living man.

* * *

The body of Mrs. Christina aged 50, was found hanging from a windmill at Roseberg 30 miles south of Medicine Hat, last Friday. Deceased had been housekeeper for W. G. Parker of that district.

* * *

For the first time in history the amature golf championship of the United States passed into Canadian hands when Ross Somerville, of London Ont., out played Johnny Goodman, of Omaha, in the finals last Friday

* * *

Fifty laymen in Winnipeg are undertaking the task of devising ways and means to replace the shortage in the Church of Engnand funds in the diocese of Land, to meet current obligations.

* * *

At the afternoon tea held at the parish hall last Monday, Mrs Sewnham won the first prize in the card contest and Mrs. Bainbridge got the consalation. Mrs W. Champ drew the lucky number in the quilt drawing.

* * *

By defeating Medicine Hat box lacrosse team in Calgary last week—end the Shamrocks of Calgary ow play Edmonton for the championship of the province. They will be home and home games the total score to count.

Change in C. P. R. Timetable Sunday

No. 1. Will Not Then Leave Redliff till 18:01

Citizens are reminded of the change n the C. P. R. time table which takes place on Sunday next.

No. 1 westbound which at present goes through here at one o'clock noon will in future go through at 18:01 or one minute after six in the evening.

No.2 eastbound will leave Redcliff at 8:42 a.m.

No. 4. eastbound will leave Redcliff at 22:27 or 10:27 p.m.

It will be noticed that the biggest change is in No. 1, which after the change will be five hours later. This will no doubt mean that the present noon mail from the east will not be secured till the following morning.

LTHBRIDGE SUPINOS
WIN BENNETT SHIELD

The Bennit Shield, which is emblimatical of the football championship of this province was won by Lethbridge when they defeated Edmonton by 4 goals to 2 last Saturday in Calgary in the final tilt.

The news of their victory was chearfully and enthusiastically received by both players and fans in the Medicine Hat-Redcliff league.

Mr. J. Williams, provincial health inspector, paid an official visit to town yesterday. To the Seview he stated that on the whole conditions here were favorable but that a few changes would have to be made along some lines.

* * *

Quite a number from Redcliff went to Medicine Hat to join in the reception for the Governor General and party. Many here were disappointed that a trip to the school in Redcliff was not included in the program for his Excellency.

Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

* * *

ST. AMBROSE CHURCH

Rev. Malcolm Stewart, Vicar
9 a. m. Holy Communion.
10 a. m. Sunday School.
1st and 3rd Sundays
11 a. m. Choral Eucharist.
2nd, 4th and 5th Sundays
11 a. m. Mattins and Sermon.
7:30 p. m., Evensong and sermon.

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow
Sunday, Sept. 25th.
10 a. m. Church School.
11:15 a. m. Morning Worship
11:15 a. m. Anniversary Sunday
3 p. m. Bowell.
7:30 p. m. Anniversary Service.
Dr. Thomas Powell will speak at all of these services. Special music by both choirs.

Drumheller Game Set Back to Oct. 2nd

Arrangements Made to Take Players By Car

Owing to arranged plans of other sporting circles in Drumheller it has been found nessery to set back the dae for the meeting of Redcliff All-Stars with the Drumheller touring team in their home city, for one week.

As a result the game advertised in our last issue for Sept. 25th has been set back to October 2.

Arrangements have been completed for the All-Stars to leave Redcliff on Saturday, Sept. 1st, just as early as the players can get off work for the day. This it is hoped will be not later than noon.

Cars will assemble at the local armory to take care of the team and those who have already signified their intention of going. Besides these it is also expected that several private parties will joi the procession.

The following players are requested to see some member of the committee in charge and let him know what time they will be prepared to leave:

J. Hope, T. Davies, G. Davies, J. Davies, Houston, Kilnor, Foy, Podesta and Thomson.

The fllowing are the members of the committee:

W. Evans, B. Moore, A. G. Osgood, R. Schmidt, C. Newnham, and E. L. Stone.

NOVEL SIGHTS IN LOCAL GARDENS

There have been several novel sights in Redcliff gardens this year. Mrs. Lakey has had a nice assortment of ripe fruit on her cherry trees and the Editor had the pleasure of eating cherries and apples out of his own garden. Another novel specimen may be seen in Geo. Weigner's garden. It is what is called a guinea bean, measuring four and a half feet long and weighing 12 pounds. It is of the marrow family only longer and smaller around than the vegatable marrow.

Hon. O. L. McPherson Visits Elkwater Lake

Much Impressed With Needs or Improvements

Hon. O. L. McPherson, provincial Minister of Public Works paid a visit to Elkwater Lake last week-end. The minister was much impressed with the possibilities of developing this resort for a recreation ground for people of the surrounding district. He was not aware that the Southern Alberta prair ie had such a favorable spot and he assured members of the Cottagers Association of Elkwater Lake that steps would be taken to have this resort improved.

The attention of Mr. McPherson was drawn to the necessity of securing a better drinking water supply; the urgency of completing the creek diversion works to prevent further lowering of the lake level; the extention of thoroughfares in proximity to the beach and other matters.

The Minister was most favorably impressed with the suggestions made and the committee is very hopeful of seeing something done in this regard this fall.

Medicine Hat Arena Destroyed By Fire

Was Insured For $16,000 and Will Be Rebuilt

Fire completely distroyed the Area at Medicine Hat early Saturday morning.

tI is thought that cigar or cigarette stubs dropped by the crowd which attended the boxing tournament the night before caused the fire.

This area was built in 1924 by popular subscription. It cost in the neighborhood of $23,000. There was $16,000 insurane on he building. It is expected the shareholders will replace the building as soon as possible.

Rotary club and Kennel club equipment were totally distroyed These were also insured.

Bingville Will Harvest 100,000 Bus. Wheat

Threshing and Cutting Was Delayed By Rain

From all reports Bingville district will probably have the best average crop around here this year. It is estimated that about 100,000 bushels of wheat will be threshed in that centre this season. Thrshing there has been considerably delayed by rain and there is still a considerable acerage to be cut.

Despite this fair crop, however, the final results will be none too encouraging as the low prices, seeding and harvesting expenses and the long haul to market, will not leave the farmers much for their season's operations. In this connection, however, Bingville is not an exception. Nevertheless there is still much for which to be thankful and Bingville farmers accept the situation in that philosophic manner which is characeristic of the district.

Mr. B. Moore was a business visitor in Regina last week-end.

* * *

Sidney Hooper, who was at one time a partner of Walter Huckvale in the ranching business south of Medicine Hat, died in England last week.

* * *

Chas. McKay, who has been visiting his bother, G. A., here for the past few wetks, left last Monday for Medicine Hat where he has secured a position at his old trade with the C. P. R.

* * *

Mr. A. Brydle has closed up his blacksmith shop here ad is leaving today with a car load of machinery for his fruit ranch near Creston, B. C. Mrs. Brydle and family will follow in a few weeks.

* * *

Mrs. Vernon, of Montreal, was a visitor in town last week-end, the guest of Mrs. P. Campeau. Mrs. Vernon, who resided in Redcliff several years ago, was on her way home from Vancouver where she had been visiting her daughter.

"Going Up".

"The Hearts Content", gallant little Puss Moth plane that carried her courageous pilot, Captain A. J. A. Mollison, on the first East to West solo flight across the Atlantic, went up in new style at Wolfe's Cove, Quebec, recently.

Obeying the orders of his physician and the request of his backer, Lord Wakefield, Captain Mollison decided to return to England in the Canadian Pacific liner "Empress of Britain". The monoplane went, too, and is seen being hoisted over the side of the liner.

Inset is Captain Mollison waving a greeting to Montreal Light Aeroplane Club pilots who roared past the Empress of Britain in a flying farewell.

Do Unions Do Away With Political Parties

Experience Shows it Makes New Political Parties

There is a great deal of talk these days about getting rid of the old political parties and forming union governments. British Columbia is the latest province to be agitating along this line.

So far as the government of provinces is concerned there is no need for parties but how can it very well be avoided?

In all organizations the major ity rules wheather it be lodges, villiage, town or city councils, provincial or federal governments. So far as the first four are concerned it is seldom that the minority developes into a real live opposition as questions coming before them are mearly matters of opinion among its members and effect only a comparitively few people. But in provincial and federal affairs it is different. Union governments have been tried both federally and provincially in Canada and in every case there has been an opposition. Sometimes this opposition has been called by one name and sometimes by another, and sometimes there have been several opposition groups called by several different names. In all cases these opposing groups are recognized as political parties.

Why then have union governments since they do not do away with political parties but rather have a tendency to increase them? Manitoba has a union government but it still has political parties in opposition and still more in the making. Alberta thought it was getting away from party government eleven years age but instead it has entrenched in office a political party that has made all previous political parties look like a Sunday School choir on practice night.

Our experience in the past has been that unions do not do away with political parties but rather give birth to other political parties. Since a rose called by any other name—you know the rest—why change the old names only? What's the use of all this talk about doing away with the old political roses?

Wheat prices today—Winnipeg 1 nor. cash 51⅛; Oct. 52⅛; Dec.54¼; May 59. Vancouver, 1 Nor. cash 49⅝.

* * *

New automatic telephones are being installed today and already several are in use. It is expected tey will all be connected up this week-end.

* * *

W. Sellhorn Left Monday for Edmonton to resume his studies in the university. He motored He motored to Calgary with O. Wooding who is spending his holidays there.

* * *

Daily papers these days are well punctuated with auto accidents all over he province. With the periodical rains and heavily gravelled roads auto drivers should exercise special care an i precaution. They should also see that brakes, lights etc are in good working order before starting out.

The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and, considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on war debts and reparations, the Imperial Economic Conference at Ottawa on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, people are asking.

There are, of course, certain types of people who belittle all attempts to remedy evils and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps, in many cases, the wish being father to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, completely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to abandon their extremely selfish nationalistic policies and programmes and work together for the common good of all.

While progress has been slow, and many of these conferences disappointing in the tangible results accomplished, it would be a great mistake to regard them as failures. For example, while the world still has a long way to travel along the road of total disarmament, it is travelling in that direction, as witness the real advance made in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples; it is a matter of education and each conference held is a mighty factor in enlightening people's mind and stirring their consciences. Each such conference helps each nation to more fully understand and appreciate the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve everything that was hoped of it. No conference ever does, probably never will. But the Lausanne conference did, as is now almost universally admitted, accomplish a great deal and take a long step forward towards the goal of a reasonable settlement of this most vexing problem which has been an outstanding obstacle to the world's restoration to financial and economic health.

Failure was likewise predicted for the Imperial Economic Conference at Ottawa. Whatever its accomplishments,—and these will not be fully known until the details of the agreements signed are laid before the respective parliaments of the Empire,—the conference did not end in failure. It failed of course to reach all the decisions that many people desired, and, on the other hand, it failed in the eyes of others because it reached decisions to do things not acceptable to them. Where so many conflicting interests had to be reconciled, and, failing complete agreement, compromises reached, it follows that what is regarded as failure by one interest or group is acclaimed as success by the opposing group, and vice versa. Success or failure are, therefore, comparative terms. The main thing is that each component part of the Empire now understands the position, problems and economic difficulties of all other parts as never before, and each has displayed a willingness to go as far as possible in solving those problems and overcoming those difficulties. That is all gain, and full of promise for the future. The conference really sounds the death-knell of extremist trade restrictionist policies and unlocks the door of freer and wider Empire trade. This must inevitably lead to freer and wider world trade.

Finally, those who are critical and skeptical of the value of these conferences will do well to remember that in olden days nations did not trouble very much to confer about their difficulties and strive to find a way out compatible with the dignity and interests of all; rather they were glad to find even the smallest excuse to wage war on each other. The world is turning away from that system, and conferences are the medium, slow and tedious perhaps, but in the final result more beneficial and lasting, replacing war. True, international conferences cost money, fairly large sums sometimes, but a mere bagatelle to the tremendous cost of war.

A Costly Lawsuit

Customer Of Paris Underground Railway Had No Case

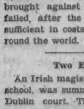
A lawsuit which lasted six years has just been concluded in Paris. The amount at issue was five centimes. Apparently, after a book of tickets for the Metro, the Paris underground railway, had been bought, fares were raised, and a supplementary charge of five centimes was demanded when one of the tickets was presented. The result was that this action was brought against the Metro. It has failed, after the plaintiff has spent sufficient in costs to have taken him round the world.

Two Exceptions

An Irish magistrate, one of the old school, was summing up a case in a Dublin court. The plaintiff was a handsome woman, and her good-looking daughter was one of the witnesses.

"Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course Mrs. O'Toole and her charming daughter."

Troubled With Her Children Having Summer Complaint



Mrs. L. E. Montgomery, Ave. K. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint.

"Thanks to Dr. Fowler's' I no longer dread the Summer months."

Labor Wants To Earn

Bulk Of Unemployed Anxious To Do Something For Living

"Labor wants to earn its own livelihood" says William Green, President of the American Federation of Labor, in deploring the fact that more than 11,000,000 are unemployed in the United States.

Fortunately what Mr. Green says is true. One of the grave dangers of these days is that there is always a tendency that a group will arise whose members will lose all ambition and expect to be kept in ease and comfort by the state.

Sure To Be Clean

An English actor appearing at a seaside resort for a week, had some difficulty in securing accommodation. In the end he was forced to consider very grubby diggings.

Being a fastidious fellow he said to the landlady, "Are the sheets on my bed clean."

"Lor' bless you, yes, sir," replied the woman. "The last gentleman as 'ad 'em, took 'is 'swim reg'lr every Friday."

More Divorces In West

Increase Is Shown In the Four Western Provinces

Divorce is decreasing in Quebec, Ontario, Nova Scotia, Prince Edward Island and the Yukon, but in New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia and the North West Territories it is increasing according to figures taken at the census by the Dominion Bureau of Statistics. There are in all Canada 7,441 divorced persons, as compared with 7,401 ten years before. They numbered 4,400 in 1912, and only 661 in 1901.

The striking feature of the divorce situation in Canada is that in the old provinces with an older Canadian population, more homogeneous and with more of its population province-born, divorce has decreased. But in the newer provinces where there has been a larger percentage of incoming population divorce has increased. The most notable example of this is British Columbia where the proportion of those born outside that province is the greatest in Canada, the greatest increase in divorce has taken place.

The increase in British Columbia is 622 in a decade, or from 1,030 to 1652. That increase is greater than the total increase in Canada which was only 40. Alberta coming second in the category of non-province born, increased 312, or from 102 to 1,014. Manitoba, which has a greater urban population than Saskatchewan increased from 506 to 600, Saskatchewan from 570 to 667.

The increases in the four western provinces was 1,178, while the decreases in the eastern provinces amounting to 1,138. Some of the difference, of course, would be due to difference in divorce legislation.

Daring Flight Proposed

Picard Plans To Make Balloon Ascension Over Hudson Bay Next Summer

Prof. Auguste Piccard, the only man who has looked twice upon the world from 10 miles above it, plans to ascend to the stratosphere again next summer from the northwest shore of Canada's Hudson Bay.

In some ways it would be a more difficult flight than the first two, for the winds blow across northern Canada might drop a balloon in wastes as dreary and inaccessible as anywhere on earth.

Nevertheless, as soon as the Belgian scientist has finished calculating results recorded by the instruments he will begin preparations for the third experiment.

"We plan to take off from the northwest shore of Hudson Bay, as close to the north pole as we can get," he said, recently. "Our purpose will be to complete the study of cosmic rays at a point where the lines of magnetic force penetrate the stratosphere. When we know how the rays act under these conditions we will have the answer to many scientific problems.

The professor said that he had risen nearly 55,000 feet, a point at which the temperature inside the gondola of the balloon was five degrees below zero fahrenheit, and outside 47 degrees below.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearances. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

Windmills In England

Artist Discovers More There Than In the Netherlands

Windmill laurels are usually given to Holland, but facts are not in accord with popular belief. An artist of Gainsborough, in Lincolnshire, England, K. S. Wood, has discovered that England has over two thousand windmills and that there are only 1,-700 in the Netherlands. Mr. Wood is now busy painting them before they disappear. He has done 200, and while he has been at work more than one hundred mills have been pulled down. Lincolnshire leads with one hundred and seventy windmills.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Trains Ignore Town

Although a college town, no trains bring students to Olivet, Mich., since the advent of the motor bus and automobile. No passenger trains stop here at all. Mail is picked up from the hooks. One freight train stops daily for parcel post and express.

Introduces New Trade

Mattress-Walker First Of His Kind, Does Good Business

A macadam road and a first-class mattress have one thing in common. But only one, of course, if the mattress is really first class.

It is, The New Yorker tells us in an editorial note, a slight crown in the middle; and out of this crown a slightly bald man named Harmon Rumsie has built an unusual career —mattress walking.

This crown, or ridge, The New Yorker tells us, "is to prevent the mattress from developing as time goes on, a gully or gulch where the sleeper's body rests." A certain lady, ignorant of this, became instantly suspicious when she received a custom-built mattress into her home the other day.

"Seeing a bulge down the middle, she thought something was wrong, and phoned the makers of the mattress to send right over." Continuing the story:

In an hour or so, Harmon Rumsie arrived, pulled the mattress on to the floor, covered it with burlap, took off his shoes, and began solemnly walking up and down on the mattress.

This prank delighted the lady and she took off her own shoes, thinking to join in. Mr. Rumsie discouraged her. He takes his work seriously.

No jumping up and down, nothing but the steady tramp, tramp, tramp, furlong after furlong till the mattress is level.

A furlong is one-eighth of a mile.

Mr. Rumsie is the only mattress-walker in the trade, says The New Yorker, as it proceeds with its account of this remarkable vocation.

He does walking in addition to his other regulation work. It would take two or three weeks of steady sleeping on a mattress to wear off the crown that Harmon Rumsie can walk off in an hour or so.

He gets two or three calls a month to go mattress-walking—more calls in summer than in winter, more calls in November than in any other month. He calls his visits "sittings."

Sometimes one sitting is enough to level off a mattress, sometimes he has to go back. He walks two or three furlongs at a sitting.

Adopt Uniform Type For Braille Readers

Anglo-American Agreement Means Wider Selection Of Books

Even the blind are wildly fond of mystery novels and detective "thrillers," according to officials of the National Library for the Blind, who have just announced the details of an Anglo-American agreement for a uniform type for all Braille books. It means that American and English blind persons henceforth will enjoy a wider range of books from which to select.

Detective stories, American crime stories, will be the chief importation of Braille books into England, it is expected. Library officials say that blind readers have a great variety of tastes, but detective stories are the most popular.

Three Blind American delegates travelled to London to arrange the final details: R. B. Irwin, executive director of the American Federation for the Blind; G. F. Meyer, president, American Association of Workers for the Blind; and L. W. Bodenberg, Illinois school for the blind.

Permit Is Required

Railway Constables Check All Trains Going To Churchill

Going to Fort Churchill, the terminal point of the Hudson Bay Railway, is like a visit from Windsor to Detroit. Railway constables go through all trains en route to Churchill and ask to see the permits of the passengers. Instead of the familiar greeting, "Where were you born?" of the United States immigration men, the traveller to Churchill hears, "Permits please!"

A few hardy souls have tried to get up north without the necessary permission. But most people realize how unpleasant it would be to be stranded at Hudson Bay. It is just as well the Government exercises such close supervision. The officials have enough on their hands trying to make things go in Churchill, without being burdened with the problem of looking after a few hundred men who made their way north and had neither means of subsistence nor prospect of return.—Border Cities Star.

Valuable Bird's Nest

At Crater Lake National Park, the discovery of a "camp robber," or Ore gon Jay nest, has caused a stir in ornithological circles. So rarely are they found that an eastern ornithological society has posted an award of $100 for the location of such a nest.

An Oasis Of Beauty

New Park In the Cypress Hills Of Saskatchewan

The motrist on the south road out of Maple Creek, Saskatchewan, climbs 1,800 feet to the newly created Cypress Hills Provincial Park; an area of eighteen square miles of pine covered hills that lies twenty miles south of the town. Here have been established by the government a forest reserve and game sanctuary. The streams are clear and cool, well suited to the rainbow and Loch Leven trout fry placed in them some years ago. As a result of the wars between the Crees, Assiniboines and Blackfeet, this area became a "No Man's Land," was little hunted and became a haven for wild life, and to this day it has been a favoured spot. The traveller is hardly aware of approaching the park, and suddenly topping the crest of hills there breaks into view a beautiful scene of forest and stream. It is truly an oasis of beauty, located in the Cypress range of broken hills, scarred with deep ravines, fantastic rock cut and rounded elevations.

Dams placed in Belanger and Lone Pine creeks, tributaries of the Frenchman River, which loses itself across the Montana Border, have created two charming lakes, 4,000 feet above sea level, known as Loch Lomond and Lock Leven, having a water area of approximately 200 acres. In addition to rustic bridges that punctuate the woodland paths in the new park, there will be found accommodation for the vacationist that includes splendid camp sites, a sixteen room sleeping building, and a nearby kitchen house.

Perils Of Motor Fatigue

Great Risk Of Accidents When Driver Is Drowsy

Regulations now demand that drivers of motor trucks shall remain on duty for only a certain period of time, so that there may be less risk of them falling asleep at the wheel and bringing injury to themselves or others on the road. This is a sensible provision, the full force of which is revealed in the number of highway accidents directly traceable to fatigue on the part of drivers, and if it were possible for operators of private motor vehicles voluntarily to adopt the same rules, there is no doubt whatever that there would be a marked lessening in the number of traffic accidents. Safe operation of motor vehicles necessitates unceasing vigilance on the part of driver. It cannot be carried out without great risk, especially on much-travelled roads, if the driver even nods at the wheel. And it has is so overcome with fatigue that he falls asleep, the consequences may be (and very often are) most disastrous.

Ex-Kaiser Owns Church

This To Property Has Been Held For Many eYars

Former Kaiser Wilhelm owns a church in North Bohemia. When the 75th anniversary of the German evangelical church of Meierjbad was observed a letter of congratulations came from Wilhelm at Doorn. He made the pastor of the congregation a member of the Order of Hohenzollern.

There are two valuable windows in the church. These were presented by the Kaiser on the 50th anniversary of the church 25 years ago. Wilhelm was the exalted ruler of the German Empire at that time. He has held title to the church property for many years. That he still keeps in close touch with affairs is indicated by the letter sent the congregation for the anniversary.—London Daily Express.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has proven it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Luxurious Car For Boy

Built To Order For Young Son Of Indian Prince

What is described as the most luxurious car ever built to order for a boy has been completed in England for the eleven-year-old son of an Indian prince, the Maharajah of Jobhpur. Beneath the hood is a four-cylinder motor that will drive the car 74 miles on a gallon of gas. The miniature seats, as well as the steering wheel and controls, are boy-size. In all respects save one the car might typify the fondest day dream of an average boy. The Maharajah has ordered special gears installed that will limit the driver's speed to 15 miles an hour.

WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 228 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 8 lbs. 4 ozs., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date, and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old."—(Mrs.) S. C. B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

Reward Wheat

Is Finding Favor In a Number Of Saskatchewan Areas

Reward wheat is finding favor in an increasing number of Saskatchewan districts according to Prof. J. B. Harrington, professor of field husbandry at Saskatchewan University. Several farmers on the heavy soil north of Moose Jaw report better yields from Reward than Marquis.

At Krydor, R. Ramsay, extension worker of the University of Saskatchewan, found that Reward wheat was replacing Garnet in favor. The Garnet wheat had lodged badly and shown considerable rust this year, particularly in the lodged spots. The Krydor district had a heavy crop and cutting was well advanced.

Dr. Harrington has returned from a trip of 1,800 miles in the province chiefly undertaken to compare tests made of Reliance wheat and Marquis wheat grown side by side at a number of points in the province.

A Colony Of Dwarfs

Everything Built On Small Scale In Suburb Of Berlin

In a southeastern suburb of Berlin a colony of some fifty dwarfs has established a miniature town. Everything for the little people is on a small scale, "small houses with small rooms filled with small furniture. The inhabitants are mostly stage folk. They have recently received official recognition of their village by the postmaster-general, who has given suthority for the building of a small post office to be called Zwergstadt, or Dwarf City. The midget citizens have planned their tiny houses not only for their own comfort, but to exclude persons of normal height.

It Has Many Qualities.—The man

who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swellings in a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Logical Deduction

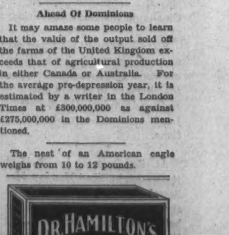
An admirer describes an actress as "having teeth like stars," which causes The St. Thomas Times-Journal to remark that "lots of us have molars that have been coming out at night since I don't know when." Anyway, it is an interesting comparision, and if teeth are really stars, perhaps the milky way is just some kind of heavenly toothpaste.—Toronto Star.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Ahead Of Dominions

It may amaze some people to learn that the value of the output sold off the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average pre-depression year, it is estimated by a writer in the London Times at £300,000,000 as against £275,000,000 in the Dominions mentioned.

The nest of an American eagle weighs from 10 to 12 pounds.



U. S. Foreign Population

Canadian Exodus Southward Shows Decline In Recent Years

The belief common in Canada that most of the Canadians living in the United States migrated southward in recent years is contradicted by a bulletin on the 1930 census issued by the commerce department at Washington.

It is disclosed in the bulletin that of the 1,378,421 natives of Canada resident in 1930 in the United States, 505,566 or 39.5 per cent. settled here in 1900 or earlier. Between 1901 and 1914 inclusive, 332,211 or 15 per cent. entered. Thus there are 737,777 Canadians in the United States, 57.5 per cent. of the total, whose migration dates from the pre-war period. The percentage is probably still substantially accurate two years after the census as immigration from Canada to the States since 1930 has been negligible.

The war-time and post-war movement from the Dominion is shown thus in the bulletin: 1915-1919, 92,371, or 7.3 per cent. of the total; 1920-1924, 207,015, or 16.2 per cent.; and 1925-1930, 241,258 or 19 per cent. There was a steady decline in yearly immigration from Canada during the last five year period until in 1930 the lowest total for several generations was recorded.

The bulletin distinguishes between "French" and "other" Canadians and shows that the French-Canadians living here have, on the average, a longer term of residence in this country. The total of 1,378,421 Canadian natives recorded in 1930 included 370,852 French -Canadians and 907,569 per cent. entered in 1900 or earlier, and 64.8 per cent. in 1914 or earlier.

The largest foreign born group in the United States, according to the bulletin, are the 2,144,642 natives of the British Isles, the Irish making the largest contribution. Next in order come 1,790,424 Italians, 1,608,814 Germans, 1,268,583 Poles, and 1,153,624 Russians. Of all these groups including the British and Irish, the bulletin shows about 70 per cent. were pre-war settlers in the United States.

Contour Of the Earth

Surface At North Pole 13 Miles Closer To Centre Of The Earth Than At Equator

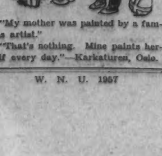
It is not generally known that the surface of the earth at the north pole is approximately 13 miles closer to the centre of the earth than is the surface at the equator. In Canada the form of the surface is determined by the triangulation and traverses of the geodetic survey of Canada, Department of the Interior, which makes scientific investigations to determine the nature of the dip of the surface as it goes north so as to allow for the 13 miles shortage in the earth's polar radius. The use of traverses in various parts of Canada to assist in determining the shape and form of Canada's surface, which is, of course, neither plane nor spherical, has resulted in much investigational research.

The Planet Venus

Find That Earth's Twin Sister Has Atmosphere Similar To Our Own

Astronomers of Mount Wilson Observatory have found indications that the atmosphere of Venus contains carbon dioxide, which is one of the essentials in life as we know it on Mother Earth. The Carnegie Institution, which made the announcement, points out that this is the first time that a gas of any kind has been identified in the spectrum of any of the sun's planets. The presence of life on "earth's twin sister," has, however, not yet been demonstrated. In any case, as Venus seems to be veiled in eternal clouds, it is improbable that any signs of life on its surface will ever be detected, even if they exist.

Steps are being taken to save for posterity Old Blantyre village school, in Scotland, which Livingstone, the missionary explorer attended.



"My mother was painted by a famous artist."

"That's nothing. Mine paints herself every day."—Karkaturen, Oslo.

The Why Of Names

Writers Use Nom De Plume For Various Reasons

The why of a non de plume for a scribbler not always the same as that of a pseudonym for a performer. A performer with an odd name will change it to a more euphonious one so that it will be remembered. Scribblers take on non de plumes for diverse reasons, these frequently more painful for the jaw than their predecessors' own cognomens.

Only one who has tried to make things easy when taking on non de plumes were O. Henry, Joseph Conrad and Mark Twain. Samuel Porter made it O Henry because of a personal reason. Conrad had to take that name or something even simpler, for his own Polish handle was a trial even to himself and particularly out of place since he wrote in English. Samuel Clemens took Mark Twain, a Mississippi river boat term, simply as a gag, and when the name jumped into sudden fame he had to continue it.

Cosmo Hamilton got that tag because his brothers family named Gibbs were all scribblers, and he didn't want to be confused with the others. Willard Huntingdon Wright, as a serious essayist, stuck S. S. Van Dine on his mystery tales, as he didn't want to know he had sunk that low.

Names Mean Something

Similarities Often Cause Confusion, Especially In Business

A New York morning paper recently carried this announcement: "Partnership of J. P. Morgan and Fred Seither, known as J. P. Morgan & Co., of 74-08 Rockaway Boulevard, has been dissolved." Such name similarities frequently confuse. Thomas Edison, Jr., in early youth, once displeased his father by accepting a post with an electrical concern which exploited his name. There was a Henry Ford Automobile Company in Jersey City, the proprietor's real name being Henry Ford. His business was respectable and nothing could be done about it. The Tiffany jewelry firm secured an injunction against The Tiffany Film Company. The original Tiffany offered no remonstrance until the film company used a big diamond as a trademark, sloganized thus: "The name stands for gems of the highest quality."

Canadian Farm Facilities

Modern Conveniences Now Well Distributed In Most Farming Districts

Compilations from the official census of Canada, taken in June, 1931, discloses that the number of automobiles and motor trucks on farms in the Dominion more than doubled in the ten-year period 1921-31. There is on farms in Canada one automobile for every 2.27 farms. In 1921 the number of farms reporting tractors was 43,578; in 1931 the number of farms using tractors was 97,176, an increase of 123 per cent.; similarly the number of tractors increased in the ten-year period from 47,455 to 105,059.

Self-binders in use in Canada totalled 431,339; there are 8,925 combine harvesters and 4,794 headers. Cream separators are almost exactly the same in number as self-binders—431,277. Gasoline engines are used on 155,655 farms and electric motors are used on 14,638.

One farm in 6.06 has a radio; one in 3.11 a telephone, one in 8.61 has water piped in the kitchen, and one in 20.17 has water piped in the bathroom. Over 73,000 farms have gas or electric light.

More than one-half of all the farms in Canada are found to be situated less than five miles from a railway station, and more than 75 per cent. of all farms are served by improved roads.

Estate Covers Forty Acres

Grounds Around Buckingham Palace are Tastefully Laid Out

Not many of those who wander through the grounds of Buckingham Palace realized that those grounds, which include lawns, flower-gardens, lake and woodland scenery, are over forty acres in extent. The gates at Constitution Hill are opened only on the annual garden party. Just before their opening a policeman tries them. Then a plumber and his mates solemnly oils them. Then someone throws them apart. The procedure never varies.

The Byrd Antarctic Expedition found that automatic cameras would not work when the cold reached 20 degrees below Fahrenheit.

Alberta farmers, it is claimed, can fatten swine more cheaply than any other part of the world.

FUTURE CAPTAINS BOLD OF THE KING'S NAVY

Major-General the Earl of Athlone, brother of Queen Mary, inspecting the cadets at the Nautical College, Pangborne, Berkshire, on Founders' Day.

Need Of Proper Films

Guarding Against Moving Pictures Unsuitable For Children

"There is a great work which could be done by the women's institutes in this country and that is seeing that children do not attend films which are unsuitable for them," declared Mrs. Stanley Baldwin, speaking at Ottawa to more than 300 women's institute members of Ontario and Quebec.

Mrs. Baldwin explained she had taken a great interest in this enterprise in England but had not been successful in her endeavors. But she hoped the women of Canada, through the institutes would be "pioneers in the films for children movement" and that they would insist that an hour should be reserved with appropriate pictures shown them. "Children's minds are like like sponges," she said.

More Divorced Men

Figures Show More Divorced Men In Canada Than Divorcees

There are more divorced men in the Dominion than divorcees, the figures show—4,049 to 3,392. Included under the heading of "not stated" are 9,149 persons, but it is explained that of these 7,925 are Chinese absent from the Dominion with permission to return and therefore counted in the population.

The highest percentage of single persons is in Quebec where they number 62.19 per cent. of the population. British Columbia has the largest number married with a percentage of 48.76. The coast province also has the greatest percentage of divorced persons—24—but Ontario has the largest actual number with 2,086.

Analyzing Old Violins

Two violin-makers of Basle, in Switzerland, have been examining old violins to find the secret of their superior resonance. A powerful microscope showed the investigators that the wood was not only polished but that it was also impregnated with a metallic substance.

Italy plans to repair and improve all state-owned buildings.

With Paddle and Canoe In British Columbia

Charm Of B.C. Scenery Can Be Enjoyed To Utmost On Canoe Trip

The canoe routes of British Columbia provide many features that are novel and characteristic. The mountains, no doubt, contribute largely to this and furnish picturesque scenery as a background for many of the trips. Cruises are open to the traveller wishing to stay within touch of civilization, as well as to the one desiring a holiday on lakes where the paddle of the white man has rarely been dipped.

The charm of British Columbia scenery is well displayed to the canoeist travelling over the route which cities through Whiteswan, Eutsuk, Tetachuck Lakes and the Intahtah and Coiashunkut Rivers back to the starting point. Leaving Burn's Lake on the Canadian National Railway the outfit is transported by motor truck to Goiza Lake. On the cruise no settlements are met with, but the wilderness extends a welcome and, as the canoe glides through the clear waters, displays snowcapped mountains, glacier and heavily timbered slopes for entertainment. Deer, bear, moose, caribou and goats, ducks, geese, and ptarmigan are some of the subjects offered to the sportsman armed with rifle or camera. On Whiteasli Lake swans are plentiful but these enjoy strict protection.

Hardly Seemed Worth It

Uncle Walter was paying his brother a visit for the first time in six months. Arriving at the house, he was met by his little nephew.

"Well, sonny," said Uncle Walter, "how did you like the book I sent you for a Christmas present?"

The boy thought hard.

"Oh, yes!" he said at last. "I remember. I haven't looked at it yet."

"Why, how is that?" asked the uncle wonderingly.

The youngster shrugged his shoulders and replied blandly:

"Because mother said I must wash my hands before I touched it."

In one day recently 183 divorces were granted in London.

Has Its Bright Side

Some People Have The Money To Buy English Estates

The story from London, England, concerning the break-up of old estates in England, and the partial dissolution of the landed gentry will bring a pang to all those who dislike to see the passing of old and cherished things which have contributed so much to British civilization. It seems that Burke's "Landed Gentry," the "Who's Who" of the bluebloods, will now have to be published in two sections, one containing the names and pedigrees of those who still are landed, and the other the names and pedigrees of those who have been "disbanded." We are told that of 2,500 families originally in Burke's, but two-thirds remain intact from the ravages of taxation and changed conditions. A sad story, indeed, as we have suggested. But there is the silver lining. It is obvious that the estates could not be sold if there were no buyers. But buyers there seem to have been, and that means that if the peers and the squires haven't the money, others have.—Ottawa Citizen.

Sound Registering Apparatus

Measuring Various Noises That Disturb Peace Of City Dwellers

Measuring the various noises to which big city dwellers are subjected with the latest and most delicate sound registering apparatus, a German finds that at the sound of tearing paper the noise indicator pointed near 44, for horse-drawn vehicles, trolley cars and subway were 59, 63 and 80 respectively. The honking of an electric motor horn 92, while only 80 was registered when an ordinary motor horn sounded. The roar of a hungry lion ran a close second to the noises discharged by a wide open motor cycle. The respective figures were 101 and 102. Indoor experiments revealed that a room with 200 adding machines in operation is as noisy as a metropolitan thoroughfare at noon.

London's Big Clock

Big Ben Gets Out Of Reckoning Twice In Every Hour

Big Ben, London's big clock, goes wrong twice in every hour. When the hugh minute hand gets to about ten minutes past the hour the strain on the spindle to which it is attached begins to be tremendous. This hand is ten feet long and no featherweight. The result is that it "races" between ten past and twenty past each hour and reaches the figure IV. seconds too early. Then comes the upward journey after the VI. is passed. From twenty minutes to until ten to the strain tells again and the hand reaches the X. five seconds late. Luckily the five seconds gained during the downward half is just balanced.

Big Library In Hotel

Toronto boasts a hotel library with between 4,000 and 5,000 volumes. Its guardian is Miss Louise Mason, the only professional librarian in a hotel in Canada. She thinks that people are growing tired of sex problem books. Men make more requests for biography than for any other type of book. Most popular with both sexes are books of an amusing and diverting type.

Lake Baikal, in Siberia, has been sounded to a depth of 5,306 feet.

FANCIFUL FABLES

Some Leading Industries

Flour Mill Occupies Prominent Position In Value Of Products

In a review of manufactures based on vegetable products just issued by the Canadian Bureau of Statistics flour milling is rated as the leading industry of the group from the point of gross value of products. This industry, which has existed to meet domestic needs for more than 30 years, has within recent times shown a spectacular development. There are 383 flour mills in Canada, many of them of the most modern type, and their capacity is far in excess of Canada's demands, running as high as 121,000 barrels per day. In 1930 Canada exported 7,514,788 barrels of wheat flour, and the Dominion is one of the leading world-factors in the wheat flour industry.

Singularly enough the rubber industry is another which has been developed to high importance in Canada. In 1930 Canada was the fifth largest importer of raw rubber in the world, ranking after the United States, the United Kingdom, France and Germany. Nearly $70,000,000 is invested in the rubber industry in Canada, and the products of this industry find their way to the remote parts of the world. Spain, Peru, Dutch East Indies, Portuguese Africa, and China are but a few of the countries where Canadian automobile tires are sold.

The fruit and vegetable canning industry also occupies a position of importance with an output valued at over $43,000,000. It is an industry which has made great progress in recent years, the volume of fruit and vegetable preparations produced having increased 121.4 per cent. during the period of 1925-29.

Sugar refining is another large industry. In 1930 sugar refineries had a production valued at $43,000,000. The Canadian tobacco industry in that year was credited with a production valued at nearly $56,000,000.

Builds Up Good Business

Woman Has Made Success Of Selling Dental Supplies

Among the exhibits in connection with the Empire Dental convention at the Royal York Hotel, was a neat booth bearing the sign "Annie Miller, Dental Supplies." Miss Miller believes that she is the only woman in Canada in this business. Smiling and pleasant, and not in the least the aggressive type, she was interesting pioneer figure.

Five years ago, she happened to be staying at a summer resort where the guests included the family of the head of a large manufacturer of dental supplies. At that time, she had just found that she would have to earn a living. Following this acquaintance, she became a saleswoman for that firm. Shortly afterwards she made the plunge into business for herself. Now she has her own office and secretary.

She said she built her business on just one thing—she stood behind every article of dental supplies she sold. That absolute dependability was the touchstone for business, and on that principle, she thought, work was opened alike to men or to the woman pioneer.

Motor For Bicycles

An electric motor and storage battery to be attached to bicycles, has just been devised in Holland. The motor has a chain transmission to the rear wheel, and the battery can be charged overnight from an ordinary electric light socket. It has a capacity for driving a wheel 50 miles without recharging.

Wheat Exports Increase

Canadian exports of wheat in the month of July, 1932, reached a total of 19,620,234 bushels compared with 12,060,817 bushels in July, 1931. The largest buyer was the British Isles. There was also a very rapid increase in the exports of rye, which increased from 122,000 bushels to 2,480,000 bushels.

"Are you comfortable?"

"Quite."

"Well, you are sitting on your hat. —Berlingske Tidende, Copenhagen.

WORLD HAPPENINGS BRIEFLY TOLD

Peter Veregin has resigned as president of the Christian Community of Universal Brotherhood.

Wilton Lackaye, 69, for almost 40 years one of the best-known actors on the United Stage, died at his home in New York, of a heart ailment.

Recommendation has been made that Admiral Sir David Murray Anderson, C.B.E., equerry to His Majesty, be appointed Governor-General of Newfoundland.

The Soviet secret police and local authorities in a decree issued by the government were ordered to adopt energetic measures to stamp out private speculation in foodstuffs.

Word has been received of the death, in Karizawa, Japan, on August 19, of Dr. John G. Dunlop, noted Canadian missionary, who for the past 15 years has been in Japan.

Royal cattle have been sold to Communist Russia, it is understood. Two shorthorn bulls, exhibited by King George at the recent Royal agricultural show, were purchased by the Soviet.

Madeline Slade, follower of Mahatma Ghandi, the Indian Nationalist and civic disobedience leader, has been sentenced to one year's imprisonment for defying government ban against her appearance in Bombay.

London jewelers now use smoke screens to save their diamonds from window-smashing thieves. "Smash-and-Grab" raids have grown so alarmingly that insurance companies have raised their burglary rates.

Members of the Irish Republican army have warned managers of Dublin moving picture theatres not to exhibit films showing members of the royal family, or any films which they regard as containing "British propaganda."

For Unemployed Families

Seven Provinces Have Signed Agreement Under Settlement Plan

Seven Canadian provinces have signed agreements under a relief settlement plan by which the Dominion, Province, and municipality concerned each contribute one-third of a sum not exceeding $600 per family to cover the cost of modest establishment on the land and subsistence for the first two years. The relief settlement plan is for unemployed families resident in the provinces, who are in receipt of direct relief, and are qualified and physically fit to undertake life on the farm.

This relief settlement plan is primarily an unemployment measure—not a colonization scheme. The underlying principle of the plan is to help people to help themselves by enabling families to contribute to their own maintenance and eventually become self-supporting. Public moneys that would otherwise be spent in the form of direct relief to maintain families in comparative idleness will be expended toward assisting qualified families to get a modest start on the land.

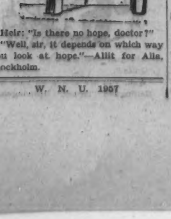
Demand For Flaxseed

The Canadian Department of Agriculture reports a good demand in Ireland for Canadian pedigreed flaxseed for sowing purposes. The demand of the Irish linen industry for Canadian fibre flaxseed is attributed to the quality, germination and purity of the seed assured by the system of government inspection which is in effect.

Recognition Deserved

A "Long Service" prize was presented to an old woman of Bologna, Italy, named Francesca Felicetti, for having been employed by one family for seventy-seven years. She had entered their service at the age of twelve. Twenty-nine other servants have also been presented with prizes for over forty years' service with one family.

Twelve thousand performers took part in a cotton pageant held recently at Manchester, England.



Hale: "Is there no hope, doctor?"

"Well, sir, it depends on which way you look at hope."—Allit for Alls, Stockholm.

Miracles Of the Blind

Few People Appreciate Handicaps Under Which Some People Work

We have just been looking at a picture of Dr. Helen Keller, the blind and deaf American authoress, and Captain Ian Fraser, C.B.E., M.P. The photograph was taken at Saint Dunstan's, in London, England, the famous hospital where so many blind soldiers were taught to do wonderful things.

In the picture Dr. Keller has her fingers against the lips of Captain Fraser. He is talking normally and she is following every word through feeling his lips with the tips of her fingers. As he has taken an active interest in the work of St. Dunstan's for years, Captain Fraser and Dr. Keller would have common topics for conversation.

We don't always appreciate the handicaps under which many men and women work. In spite of her double affliction of blindness and deafness, Helen Keller has been an outstanding success. Born 52 years ago in Alabama, she lost her sense of sight, smell and hearing when only 19 months old by an attack of scarlet fever. As a child she was taught to speak through the Braille system and the deaf and dumb language. Since then she has become a world figure.

Hundreds of others have not attained the renown of Helen Keller, but they have battled successfully against physical handicaps that are conquered only through determination and courage.

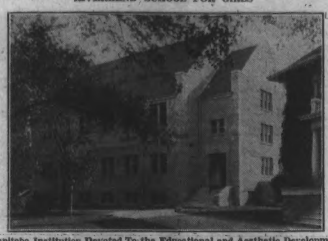
RIVERBEND SCHOOL FOR GIRLS



Manitoba Institution Devoted To the Educational and Aesthetic Development Of Young Canadian Womanhood

Prepared to provide instruction from Grades 1 to 12, Riverbend School for Girls, Winnipeg, will reopen for the autumn term on September 13th, according to an announcement made by the Principal, Miss Joan Foster, M.A.

Since 1929, when Riverbend, the former home of the late Sir James Aikins, became, through his bequest, under the aegis of the United Church of Canada, a boarding and day school for girls, it has reached an academic standard approved by the Department of Education, by which it is regularly inspected. Eight acres of beautifully treed property skirting the Assiniboine River have proven an ideal location for an institution devoted to the educational and aesthetic development of young Canadian womanhood.

Two years ago, the original buildings were augmented by a new modern structure of cut stone and brick, containing assembly hall, dining-room, class-rooms and gymnasium, all with ample accomodation for 190 pupils. University matriculation is an objective, but to meet the needs of those who wish to devote themselves more particularly to the study of literature, history, music and art, a course is offered leading to the Riverbend Diploma, given upon completion of Grade III.

Miss Foster, who is a graduate of McGill and Oxford, is assisted by Miss Laura Cull, as head of the junior school, and the more recent acquisitions to the teaching staff include Miss Marian Macdougall, science; Miss Mary Chestnut, Classics; Miss Beatrice Wilson, director of religious education; Miss Barbara May Erith, English; and Miss Gwen M. Bowman, physical education.

Miss Macdougall, a graduate of Dalhousie University, comes to the Winnipeg school as a qualified teacher of the science required for senior high school work, specializing in University and the Ontario College of chemistry. Miss Chestnut, Manitoba Education, has taught successfully in Manitoba high schools, Miss Wilson, in addition to her course at University College, Toronto, has studied at Emmanuel College and the United Church Training School, and has taken the regular normal school training course with subsequent success as a teacher. Miss Erith comes from London University with honors in English. She holds a London teacher's diploma and has had experience in English and American girls' schools.

Thoroughly qualified to teach corrective gymnastic, dancing and swimming, as well as apparatus work, Miss Bowman is a graduate of the Margaret Eaton School of Physical Education, Toronto, and has had previous experience in a girls' school.

Due to the fact that the Winnipeg city schools are this year discontinuing the teaching of Grade XII, increased emphasis has been placed upon this grade at Riverbend. The members of the teaching staff are all fully qualified, and are specialists in the subjects taught.

The school's representative Board of Governors includes James A. Richardson, L.L.D., Isaac Pitblado, K.C., G. N. Atkins, K.C., Rev. J. A. Cormie, D.D., D. C. Coleman, L.L.D., Principal John Mackay, D.D., W. M. Neal, Rev. J. W. Aikens, D.D., Lawrence F. Paik, Mrs. David Watt and Mrs. R. F. McWilliams, Honorary Secretary.

On its Advisory Council are many names familiar in the church and cultural life of Winnipeg, and the following from other points in western Canada, from which many of its pupils are drawn: Mrs. C. E. Arm-strong, Moose Jaw; Mrs. Robert Forke, Pipestone; Mrs. C. F. Adams, Calgary; Mrs. A. F. Laird, Yorkton; Mrs. B. C. Wallace, Edmonton; Mrs. J. E. Brownlee, Edmonton, Mrs. W. C. Murray, Saskatoon; Mrs. T. A. Nellin, Brandon; Miss Alice Fife, Kenora; Mrs. Douglass J. Thom, Regina; Mrs. A. W. Scott, Calgary.

Helped To Make History

Man Who Surrendered Jerusalem To British Died Recently

The "man who surrendered Jerusalem to the British" recently died in the Government hospital at Hebron at the age of 65. He was Ahmed Sharad, and was an inspector in the Turkish gendarmerie in Jerusalem when it was captured by the British in 1917. In company with the late Mayor of Jerusalem, the inspector walked to the outskirts of the city carrying a white flag on a long bamboo pole and delivered it to the British vanguard.

Why Steal It

"Where's old Bill been lately? I haven't seen him for months."

"What? Haven't you 'eard? He's got three years for stealin' a car."

"What did he want to steal a car for? Why, didn't he buy one an' not pay for it, like a gentleman!"

New Equipment For Houses

Air-Cooling System Will Be Part Of Modern Necessities

The day is coming when "a modern house" will mean not only one equipped with a bathroom and a furnace, but with an air-cooling system. The device is still too high priced, and more or less in the experimental stage; but it will become perfected and less expensive in a few years, and we shall then be able to live and sleep in quiet, air-cooled and air-washed rooms, with the house windows and doors shut to keep out the hot air, and incidentally, the disturbing noises of the streets.

Coomb was an old British corn measure, containing four bushels.

South Africa has a movement to stop hoarding among farmers.

Bulgaria plans to spend $9,250,000 on its state railways.

Move Store Of Gold

Sufficient Of Precious Metal To Pave a City Street

The United States Government began the task of moving enough gold to pave the main street of a United States city.

Sixty-eight truck loads containing gold valued at $200,000,000 were carted from the old assay office on Wall Street, New York, to the new one at South Street, and Old Slip. The work will continue until the entire stock, estimated at $2,000,000,000 is moved.

The gold is moved in armored trucks. Machine guns are mounted inside to forestall any bandits ambitious enough to attempt a grand haul. Five guards ride with each truck.

Turn Penny For Luck

Steeplejacks Are Superstitious About Money On Monument At Buffalo

The penny on the highest point of the soldiers' and sailors' monument at Buffalo, N.Y., has been turned over and Francis Nepplis expects good luck for next 12 years. Nepplis was cleaning the monument in preparation for the city's centennial celebration when he performed the ceremony of turning the penny. He explained that the first steeplejack to climb a monument puts a penny on the top. Each steeplejack who climbs the monument thereafter is expected to turn the penny. If he neglects this task, or removes the penny, he may be pursued by bad luck for 12 years.

World's Wheat Production

Much Lower Yield Is Predicted In Estimates

Total world wheat production of three million bushels below the 1931 total and 36 million bushels below the 1930 total, is forecast in an estimate issued by the Alberta Wheat Pool.

Canada's 1932 wheat crop production is estimated at 475,000,000 bushels; United States, 722,687,000, and total North American continent production at 1,206,757,000.

Recipes For This Week

(By Betty Barclay)

ORANGE BAKING POWDER BISCUITS

(Makes about 18 biscuits)

2 tablespoons shortening.
2 cups flour.
4 teaspoons baking powder.
¾ teaspoon salt.
Grated orange rind.
¾ cup milk or water.
Loaf sugar.
2 oranges, juice of
Powdered sugar.

Work shortening into sifted dry ingredients. Add 1 tablespoon grated orange rind and milk or water. Roll and cut out. Moisten half as many cubes of loaf sugar as there are biscuits with orange juice. Put between biscuits. Spread tops with powdered sugar moistened with orange juice, sprinkle with orange rind. Bake in hot oven (450 degrees Fahrenheit) 15 minutes.

BAKED DELIGHT

2 cups rice flakes, crushed.
¼ cup butter, melted.
2 apples.
2 bananas.
½ cup sugar.
½ teaspoon cinnamon.
¼ cup water.
2 tablespoons lemon juice.

Pour melted butter over rice flake crumbs and mix thoroughly. Place a layer of one-third the prepared crumbs in bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with half the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderately hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

Times Have Changed

An old farmer after paying his bill for a new reaper and binder was asked by the cashier how it went.

"Well, ye see, this time last year I sat on the fence with a cigar in my mouth and watched thirty men reaping my field. This year I reaped it myself, and thirty men sat on the fence and watched me."

More Used To Cars

Who ever heard of a horse being afraid of a cow? A Toronto man has such an equine. The horse had been reared in a city stable and until recently had never travelled the country roads. When it finally met a cow, the horse went away from there in a great hurry, and was only calmed down after considerable difficulty.

Mission Ships Never Return

Are In Service In South Seas Until Scrapped

Not long ago a gleaming white ship, fresh from the builders' ways, stole up the Thames for a brief visit before setting out on a voyage from which she would never return.

She was the "Southern Cross VI.," built at Cowes at a cost of $125,000 and destined for missionary work in the Melanesian Islands, where she will remain until she is scrapped, as all her predecessors have been scrapped.

For 73 years mission ship after mission ship has cruised through this vast island diocese in the South Pacific Ocean, which extends in a great curve parallel to the northeast coast of Australia for nearly 2,000 miles. The islands are 40 in number.

The natives there are of a primitive type, their religion is mainly ancestor-worship, with magic and witchcraft besides. The white staff of the mission, some 50 in all, are scattered over all Melanesia, doing pastoral work. The "Southern Cross VI." is their "floating church."

The Ways Of Lightning

Scientists Have Discovered Many Facts Regarding Its Vagaries

Just as if we have nothing to worry about, scientists now tell us that lightning can strike upward just as well as downward. They have 185 photographs to prove that lightning bounces. You may be quick enough to sidestep a bolt detected on its way down, but what's the use? You'll be caught on the rebound, though it probably doesn't make any difference to the person struck whether lightning hit an uppercut or delivered a rabbit punch.

In fact the whole thing oughtn't to make any difference to anybody struck or not struck. The great majority of us have survived hundreds of thunderstorms just by taking care that lightning did not fall on us from above. It wouldn't have saved many persons had the newly discovered facts been household lore a century ago. In the same breath the scientists announce that negative lightning is the deadly variety; positive lightning won't do any worse than melt the filling in one's teeth. How to tell whether an approaching bolt is negative or positive is not included in the information.—Newark Evening News.

French Wheat Quota

Harvest Satisfactory and Less Foreign Grain Needed

A hint as to the explanation of the recent action of the French Government in reducing the percentage of foreign wheat permitted in French bread from 15 to 3 is to be found in the latest reports from the French provinces to Paris, which indicate that this year's wheat harvest will be very satisfactory. A conservative estimate is 300,000,000 bushels for France and Algeria, which would be ample to cover the entire domestic needs of the French people, and all that would be required would be a modicum of the best wheat for mixing purposes. This, according to the trade agreement recently effected with Moscow, will be brought from Russia.

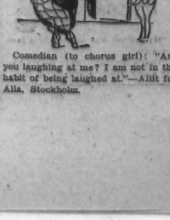
This would seem to explain the reluctance of the French Government to enter into any trade agreement with Canada at the present time in regard to wheat. Reports from other wheat-producing countries, however, are by no means so satisfactory. The Russian crop, indeed, is reported as unlikely to meet domestic requirements by many scores of thousands of bushels.—Montreal Star.

Egg Powder Plant

An egg powder plant which will consume 180,000 eggs a day has been opened at Saskatoon, Saskatchewan. During recent years China has had practically a monopoly of the egg powder business, a share of which will now be sought by the Saskatchewan industry.

Seven-tenths

Seven-tenths of the railway mileage in the Netherland East Indies is in Java.



Comedian (to chorus girl): "Are you laughing at me? I am not in the habit of being laughed at."—Allit for Alls, Stockholm.

BABY'S OWN SOAP
Best for Baby — Best for You

World Recovery

Sir Josiah Stamp Says Corner Has Been Turned

The New York Times, in a special despatch from Copenhagen, quotes Sir Josiah Stamp, director of the Bank of England, as follows:

"Money has become plentiful and cheap in England and the United States, but so far the effect has been disappointing. The reason is that confidence in institutions and in men has disappeared, but with a reasonable recovery, pluck money will come into circulation and commodities prices must rise as sure as the sun, even in a time when the business men of the world are suffering from craven and mob fear.

"When this fear has passed there will be an inquiry for the money now available, and at the same time prices will rise and peoples and countries will begin to be solvent again. There are indications of changes now in London and in Wall Street.

"I note with satisfaction that Great Britain has come back into first place in world finance, thanks to the conversion scheme. As another significant indication, I regard the rise in prices of hogs in the United States. That, together with the rise in other merchandise indicates the corner has been turned.

"The danger in the United States is, of course, that her highly speculative financial system will over-estimate the recovery, force it too quickly, and that a serious reaction will then spoil confidence. We must pray that the recovery will be steady and slow, absorbing each advance beyond the reach of fear."

Closer Economic Contact

Foundation Has Been Laid For a Great New Empire

One quarter of the world's population was united in closer economic contact when the Imperial Conference was adjourned with the signing of 12 trade treaties among membernations of the British commonwealth.

"What we have done at this conference," said Rt. Hon. Stanley Baldwin, leader of the United Kingdom delegation, "is to build a foundation on which we and future generations may erect as fair and stable an edifice as lies in their capacity to accomplish. It only remains for us to try and work in practice what we have achieved on paper, and with that sanity and forbearing which I hope will always characterize members of the British commonwealth of nations. Then it may be that generations that come after, in speaking of us, may say indeed: "They builded better than they knew."

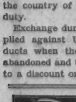
To Abolish Tax

Canada Paving Way To Encourage Trade With Britain

Canada will abolish the two per cent. excise tax against all British imports "as soon as the finances of Canada will allow." Consideration also will be given "to the possibility of reducing and ultimately abolishing the exchange dumping duty insofar as it applies to imports from the United Kingdom."

These undertakings form part of Canada's concessions in the treaty signed with the United Kingdom. The excise tax, increased from one to two per cent at the last session, applies to all imports, irrespective of the country of origin or the rate of duty.

Exchange dumping duties were applied against United Kingdom products when the gold standard was abandoned and the pound sterling fell to a discount on the money markets.



PURELY VEGETABLE
No better corrective exists today for BAD COMPLEXION and ACID STOMACH
Sold everywhere in 25c and 75c vial pkgs.
CARTER'S LITTLE PILLS

Infants Not Affected By Airplane Travel

Only Problem Being Changing Pressure Which Is Easily Overcome

For a long time there has been a discussion of the question of how airplans flights affect small babies. Apparently United Air Lines has answered the question. Within the last week its passengers was a 25-day-old infant, and one four months old, who were accepted after expert medical opinion had concurred that there is no limit to the age at which it is safe to carry children or babies, providing an elevation of 10,000 or 12,000 feet is not reached.

As regards oxygen content of the air, that need not be considered at all. However, changes in atmospheric pressure, such as are experienced at different altitudes, can constitute a problem for babies. Consequently, airplane stewardesses waken children coming in for a landing and get them to swallow a teaspoonful of water, the swallowing process equalizing the pressure in their middle ear with that of the outside atmosphere.

More Diversification Needed

American Professor Gives Advice To Farmers Of Canada

Warning Canadians to beware of optimistic estimates of the future increased consumption of wheat and counselling a greater diversion from cereal crops to other products, Dr. R. M. MacVicar, of Columbia University, New York, addressed the Canadian Institute on Economic and International Affairs at Orillia, Ont.

"The world's consumption of wheat fell 4 per cent. between 1913 and 1930, he said. The world's supply of certain commodities exceeds the demand. I do not see why Canada should not produce a greater variety of the finer products.

Referring to the Imperial Conference, he said "it would be very unfortunate if it should lead to the creation of greater barriers between Canada and the United States. Greater trade reciprocity between England and Canada would be more effectively attained by lowering barriers between them than by raising greater barriers between them and the rest of the world."

World's Grain Show

Entrants Should Make Note Of Imported Dates

The World's Grain Exhibition and conference positively will take place in 1933. Entrants in the competitive classes, exhibitors, intending visitors and others please note these important dates:

January 31, 1933—All entries in the competitive classes of the World's Grain Exhibition and Conference must be made on or before January 31, next year.

March 1, 1933—All samples entered in the competitive classes of the World's Grain Exhibition and Conference must be in the hands of the secretary, Ernest Ingamells, of Regina, on or before March 1, 1933.

July 24, 1933—Opening day of the World's Grain Exhibition and Conference at Regina.

August 5, 1933.—Closing date.

Prince Has Volumes Of Press Clippings

Collection Is One Of Largest and Most Interesting In World

The Prince of Wales must have one of the largest, and most interesting, collections of press clippings in the world.

Another volume has been added, bringing the total to over 40, bound in half-morocco, each of which contains nearly 7,000 cuttings.

Wherever the Prince goes throughout the whole world, his movements are closely followed by a press clipping bureau, which collects reports from newspapers of every nationality. Each half-year a selection of these is made and they are bound.

The collection covers the life of the Prince from 16 and every public incident of importance since then is reported. By the time he was 27 there were more clippings in the Prince's collection than in that of the late King Edward, which covered his lifetime.

Earned His Money

"Daddy," said the son of the house, "you said if I saved you 90 cents you would give it to me, didn't you?"

"That's right, my son," said his father.

"Well," said the boy timidly, "you remember you promised to give me 50 cents if I passed my school exams?—well, I didn't pass, so I've saved you the 90 cents.

Hunter-Bay Coppermine River Map

Farthest North Map Of the National Topographic Series

There is a great deal of popular interest in the rich radium and silver discoveries recently made at Great Bear Lake, and in order to assist in the exploration and development of these resources the Topographical Survey, Department of the Interior, Ottawa, has just published a new map sheet known as the Hunter Bay-Coppermine River sheet of the National Topographic series. It is the farthest north map of this series yet issued, extending from latitude 66 to latitude 67, and in longitude from 114 degrees to 118 degrees. It was plotted from aerial photographs taken by the Royal Canadian Air Force in 1931. As a portion of the area in the northeast corner was not covered by these photographs, that part perforce still remains blank.

The area covered is part of the Canadian Archean shield, also known as the Laurentian plateau. It is mountain by rocks of pre-Cambrian age has a rocky, irregular, hummock surface, with relief rarely exceeding a few hundred feet. The hollows are filled with lakes which are almost innumerable. This area lies on the edge of the Laurentian plateau, the western boundary of which follows approximately Slave River, the north arm of Great Slave Lake, and a line extending north to Great Bear Lake. West of this boundary lies the Mackenzie lowland, an extension northward of the great central plain of North America.

This region is part of the district of Mackenzie, the area of which is given as 527,490 square miles; Mackenzie is one of the districts of the North West Territories, the total area of which is 1,309,682 square miles, over one-third of the whole area of Canada. The present map includes about 7,600 square miles. The Coppermine River crosses the sheet from south to north, while on the west is shown a portion of the east arm of Great Bear Lake.

The line of demarcation between the forested area and the great treeless Northern Plains crosses this region and is indicated by a green colour over the wooded part. The Mackenzie district forests are a northerly extension of the forest belt of western Canada. The northerly limit is not determined by climate alone but by soil conditions and to a very large extent by drainage also. The line of demarcation between wooded and treeless areas is very irregular. Here and there, far beyond the main forest body, fringes of trees are found growing along the banks of the Coppermine River and some of its tributaries. Isolated clumps of trees flourish in favourable localities, while and black spruce and birch being the predominate species of trees, while willows and alders form a considerable underbrush. As the northern limit of woods is approached the species are more or less stunted in growth, and curious instances of trees many years old but short and squat may be found.

Beyond the wooded areas lie the Great Northern Plains, formerly known as the "barren grounds," so named by Samuel Hearne who made an exploration in 1770-72 overland from Churchill to the Coppermine River and the sea-coast at its mouth, returning by way of Great Slave Lake. He no doubt so designated this type of country on account of its lack of trees, but it is not in any sense barren. Wherever sufficient soil has accumulated, abundance of plant life is found every season. The ground is almost everywhere covered with a thick soft carpet of various kinds of mosses and lichens. In addition there are many species of flowering plants during the short Arctic season. About the middle of June these are in full bloom. Beautiful blue lupines sometimes cover acres of ground. Yellow Arctic poppies, white and red saxifrages, blue forget-me-nots and many other species of attractive plants are equally as plentiful. Completing the vegetation are the coarse grasses and sedges, the green of which combined with the great variety of coloured flowers makes a landscape of wonderful beauty.

The part of this country lying between Coppermine River and Great Bear Lake is included in the Yellowknife Game Preserve, one of the four areas set apart by the Government as exclusive hunting grounds for the native Indians, Eskimos and half-breeds. This policy prevents exploitation of the fur resources of these areas, and it is hoped also will tend to foster and increase the supply of game which will overflow to the adjacent districts where commercial hunting and trapping are allowed. The fur-bearing animals include muskrat, beaver, marten, ermine, mink and fox, while great herds of caribou range over the Northern Plains feeding on the grasses, sedges and tender shoots of willows and dwarf birches and on the lichens and mosses during the long winters.

Of chief interest at the present time, however, is the remarkable richness of the mineral discoveries at Echo Bay and vicinity. Rich deposits of pitchblende, the most important ore of radium, have been located at and near Labine Point. Not less important than the pitchblende deposits are the discoveries of remarkably rich native silver deposits. When it is considered that Echo Bay is over 1,100 miles north of the latitude of Winnipeg, one may have some idea of the problems to be met and overcome in this new mining centre. Copies of the new map can be obtained for a nominal price upon application.

Women Explore Rockies

Rare Plants and Insects Found In Northern British Columbia

Unknown glaciers and valleys in northern British Columbia have been explored by two daring Philadelphia society women, who recently returned to Edmonton.

The explorers were Mrs. J. Norman Henry and her daughter, Miss Josephine de N. Henry. Last year they were in the party headed by Dr. J. N. Henry that discovered the tropical valley in the northern wilderness.

Many rare specimens of plant and insect life brought back by the two women will be presented to the Academy of Natural Sciences in Philadelphia. In addition, they obtained a large number of photographs of flowers, game and the surrounding country.

THE RHYMING OPTIMIST

By Aline Michaelis

OF BEAUTY ALWAYS

Of beauty always has the poet sung,
Of loveliness of glance, or line, or scent;
The silver stars against night's shadow swung,
The young moon dangling in the firmament;
The rose, the lark, and mounting wave, and mist;
The shining beaches swept with golden light;
Rare chrysoprase, and pearls, and amethyst
Make warp and woof of every bard's delight.

And he has sought for beauty, till he finds
Some trace of it in even the lowliest place;
Its petals strewn where every roadway winds,
Its fleeting look on each familiar face.
He has become a prophet and a seer
Whose quest of beauty brings it ever near.

Britisher To Explore Stratosphere

Designs Balloon To Reach Height Of Seventeen Miles

Oswald Short, famous British air pioneer, is designing a balloon to explore the stratosphere calculated to reach a height of 17 miles, the United Press has learned.

Prof. August Piccard, the Belgian scientist, and the first man to enter the stratosphere, reached an altitude of approximately 10½ miles in his recent flight.

Short's balloon will carry three scientific observers in a hermetically sealed aluminum hall. It will carry special wireless equipment possibly strong enough for world-wide broadcasting.

An Old Industry

House Thatching Still Carried On In Rural England

The following article is by H. Hoggins, whose family have been house thatchers for more than three generations:

Thatching, one of the oldest industries in England, is still carried on, though in a lesser degree than in the past.

The reason why many thatched roofs remain, is that most of the walls and roof timbers of old houses are not strong enough to withstand the weight of a tiled or slated roof, without a lot of strengthening.

In the early days of "wattle and daub" and half-timbered houses, thatch was greatly in vogue. Many of these old houses were apparently built around a grandfather clock, and, in the majority of cases, were incomplete without a thatched roof.

Thatchers in those days used wheat stubble—the short straw which remained after the sickles (and later reaping machines) had cut away the corn. This stubble was left in the fields until the first frost, when the farmer sent his man to "bag" it. Taking scythes or sticks, they broke it off while it was brittle, afterwards storing it for use on cottages, farm buildings, and so on.

The thatcher of today follows most of the old customs, with the exception that he uses rye or wheat straw in the length as it leaves the trussing machine. Where such straw is extra long it is cut in half before being used, and a better method of securing it has been evolved, particularly on modern houses of six to sixteen rooms.

Another kind of thatching greatly in demand today is that for which reeds are used. This makes a very serviceable roof, and lasts indefinitely.

Yet another kind of thatching is done with heather, cut when in bloom, and a very beautiful effect is obtained when this method is used on any small ornamental roof. Heather is not advised for large roofs as it is not a very good water reaister, and for that reason an undercoat of other material is used with heather thatch.

Miller's Worm-Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Taught Herself To Speak

Deaf Mute Watched Lip Movements Of Normal People

Born a deaf mute, but now able to speak, Mlle. Suzanne Lavaud, aged 28, of Paris, was a candidate for the degree of doctor of literature at the Sorbonne recently. Mlle. Lavaud, who taught herself to speak by watching and imitating the lip movements of normal people, had to answer questions on her thesis put to her verbally by the examining professor. Her thesis dealt with Maria Leneru, a French dramatist, who was herself a deaf mute.

Find Rare Tablets

Two rare Cataract tablets on which were inscribed votes cast 2,400 years ago by Greek citizens in Ostracism proceedings against Aristides and Themistocles, Greek statesmen, have been unearthed in the ancient market place at Athens, Dr. T. Leslie Shear, of the department of archaeology of Princeton University, was informed by cable.

Has Eye For Money

Rags, a spaniel owned by James Thompson, of Inman, Neb., has an eye for money. He found a pocketbook containing $35 that Thomas Chalput lost two years ago.

Little Helps For This Week

"My peace I give unto you."—John xxv. 27.

Then leave thy vain attempts
To seek for peace;
The world can never give
One soul's release;
But in thy Saviour's heart
Securely dwell,
No pain can harm thee hid
In that sweet cell.
—Adelaide Anne Proctor.

He says Himself that His peace is not what the world giveth. It does not come from anything in this life; it cannot be taken away by anything in this life; it is wholly divine. As a white dove looks brighter and fairer against a black thunder-cloud, so Christ's peace is brightest and sweetest in darkness and adversity.
—Harriet Beecher Stowe.

Benefit Canadian Farts

As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, millions of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports, J. H. Ralnville, president of the Montreal harbor commission stated.

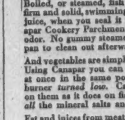
There is NO ODOR from FISH


or from Vegetables cooked in CANAPAR
Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.
And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner turned low. Canapar sets on them as it does on fish. Retains all the mineral salts and flavor.
Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-scraping afterwards.
Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.
Special Offer
CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.
Applefard Paper Products, Ltd., Hamilton, Ontario.
Enclosed find 25c for which please send me one full size package of CANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers".
